APPENDIX

Questionnaire

EXECUTIVE SUMMARY

In March, 1990, Criterion Research undertook a market potential study in California for Alberta Tourism. The overall objectives of the study were to determine how many California residents were aware of Alberta, had been to Alberta, where they had travelled in the past twelve months, what features are important in determining ultimate destinations, and what vacation experiences are part of their primary vacation.

The data for the study was collected utilizing computer assisted telephone interviewing (C.A.T.I.) between March 11th and April 4th in Portland, Oregon. The study was stratified by geographic region within California; southern California, northern California, San Diego, Los Angeles, and San Francisco. It was further stratified by market segment and income. Respondents were screened for whether their household income was over or under \$25,000 (U.S. funds). One hundred surveys were completed with respondents from households with an income under \$25,000 after which only respondents from households with incomes in excess of \$25,000 were interviewed unless they were students or retired.

A systematic random sampling was performed and 4,100 telephone interviews were conducted.

A. KEY FINDINGS

1. Market Segments

- By market segment, 24 percent of the sample were married/single, 18 to 44 years old without children at home; 36 percent were married/single with children under 18 years of age at home; and 40 percent were married/single, 45 years of age or older without children at home.

2. Vacation Behavior

- In total, 75 percent of the sample had taken a vacation of at least two nights away from home in the last year.
- Eighty-five percent reported that they would take a vacation of at least two nights away from home in the next year.
- Almost two-thirds of respondents took a vacation of two nights or more within California, while 44 percent reported having taken a flying vacation of at least 1,000 miles outside California. One-third of respondents took a driving vacation of five nights or more of which at least three nights were outside California. Approximately one in four respondents took a combined business and pleasure trip.
- California residents were most likely to take their vacations in July or June followed by August and December.
- The average length of a primary vacation trip was 11.6 nights away from home.
- Respondents whose vacation was outside California were likely to take more protracted holidays and reported that they had spent just under twelve days outside California.
- Just under one-half of 1 percent of respondents had come to Alberta on their primary trip last year while 2 percent reported they had gone to British Columbia. Another 68 percent visited somewhere else in the United States for their primary vacation. A further 6 percent reported going to Mexico, 1 percent said they went to Central or South America, 3 percent visited the Caribbean, and 11 percent said they went overseas.
- The activities or experiences most people desired when taking a primary vacation were visiting friends or relatives, relaxation, or sightseeing and touring. Older respondents were more interested in visiting friends or relatives and sightseeing while younger respondents tended to be seeking relaxation.
- The primary purpose of the main trip taken by California residents was vacation (55%), visiting friends or relatives (32%), business (5%), and convention (3%).
- The criteria people use to determine which of their vacations was the primary one, if they had taken more than one, included the length of time, importance of the destination, whether or not they had visited family or friends, and the distance away from home.

3. Vacation Planning

- Having a place to relax, natural beauty, value for dollar spent, something new and different, and lots to see and do were the five vacation characteristics rated as the most important in selecting a destination.
- Downhill skiing, golf, fully serviced campgrounds, adventure products, and shopping were rated of least importance in selecting a destination.

4. Informational Needs

- Four informational requirements were mentioned with far greater frequency than any others. They were: places to see and visit, hotel/motel accommodation information, transportation, and maps and routes.
- The informational sources usually used when planning a trip were travel agents (43%), family and friends (36%), automobile clubs (29%), newspapers or magazines (15%), and tourism departments (13%).
- Fifty-three percent of respondents reported having an automobile club membership with 23 percent being members of the Automobile Club of Southern California, 18 percent being members of the California State Automobile Association, 4 percent simply saying they belong to AAA, and 8 percent mentioning some other travel club.
- Forty-nine percent of students, retired people, and respondents from households over \$25,000 reported they had attended a sports or outdoor activity show in the past three years. An outdoor activity show would encompass such shows as a fishing, hunting, or boating show among others. Forty-four percent had attended the California State Fair, 26 percent the L.A. State Fair, and 25 percent a consumer show. Sixteen percent said they had attended a ski show in the past three years.
- Sports or outdoor shows were attended with more frequency than other shows as those respondents who had reported going to a sports or outdoor show in the past three years had, in fact, attended 3.56 times on average. Those who went to consumer shows attended approximately 1.65 times in the past three years and those who attended ski shows attended 1.49 times.
- All of the shows and fairs examined were rated more highly as travel information sources than they were as an aid to making travel decisions.

- Consumer shows and ski shows were rated most highly of all shows and fairs as information sources and as aids to making travel decisions.

5. Media Behavior

- Reader's Digest, National Geographic, Modern Maturity, Sunset Magazine, and Time Magazine were the most frequently bought or subscribed to publications by students, retired people, and those respondents from households over \$25,000. Regional magazines like the San Francisco Focus, the Los Angeles Magazine, and the San Diego Magazine have good readership within their prescribed areas (25% in San Francisco, 17% in Los Angeles, and 23% in San Diego, respectively).
- The percentage of respondents subscribing to or buying American West, Pacific Northwest, Leisure World, Outside, Backpacker, and Endless Vacation was lower than 2 percent.
- Respondents were asked to rate how thoroughly they read specific publications on a scale of one to five where one represented "not at all thoroughly" and five represented "very thoroughly." With the exception of Modern Maturity, the magazines read by the most California residents were also read most thoroughly.
- The L.A. Times was reported to be subscribed to by 30 percent of students, retired people, and those respondents in households over \$25,000 while the San Francisco Chronicle is subscribed to by 12 percent, the Sacramento Bee by 7 percent, and the Wall Street Journal and San Diego Union by 6 percent, each.
- California residents generally watched some television between 7 p.m. and 10 p.m. almost 5 nights a week while they watched between 5 p.m. and 7 p.m. four nights a week. Morning television viewing was the lowest of all time periods.
- Respondents reported watching news very frequently (5 days a week). Sitcoms were the next most popular type of shows followed by documentaries, sports, and network movies.
- Daytime and evening soaps, on average, were viewed least frequently.

6. Alberta Vacations

- Awareness of Calgary as a vacation destination (79%) was higher than awareness for Alberta (73%). This implies that a certain percentage of respondents do not know that Calgary is, in fact, in the province of Alberta. Fifty-six percent had heard of Edmonton, 44 percent of Banff, 53 percent of Lake Louise, and 45 percent of Jasper.
- In total, 91 percent had heard of Alberta or some location within Alberta as a vacation destination.
- Two-thirds of respondents described Alberta's location as "in Canada" while only 8 percent each were more specific by saying it was "east of British Columbia" or "in western Canada."
- Twenty-seven percent of California residents who are aware of Alberta as a vacation destination have visited Alberta or an Alberta location in the past and 4 percent have visited Alberta or an Alberta location in the past twelve months.
- Thirty-two percent of those who are aware of Alberta as a vacation destination said they had visited British Columbia while 4 percent said they had visited it in the last twelve months.
- Twenty percent of Alberta aware respondents had visited Vale or Aspen, 10 percent Whitefish or Big Sky, and 3 percent Whistler at some time in the past.
- Sixty-three percent of California residents were aware of the Calgary Stampede with northern California residents being most aware (66%) and San Francisco residents least aware (60%).
- Friends and relatives and advertising contributed most frequently to the awareness of the Calgary Stampede (27% each).
- Six percent of respondents have visited the Calgary Stampede and 36 percent have considered visiting the event.
- Of the various experiences provided by a visit to the Calgary Stampede, the Rocky Mountain scenery, hospitality or western experience, and the rodeo or cowboys were most likely to impact upon the decision making process.
- More than 25 percent of respondents who had visited Alberta at some time in the past had visited more than fifteen years ago while 21 percent last visited Alberta between 1975 and 1980. Thirteen percent visited between 1981 and 1984 and either 5 or 6 percent said they visited Alberta in the years since 1985.

- Most respondents who ever came to Alberta categorized their trip as a touring or outdoor vacation, with older respondents much more likely to describe the vacation as a touring holiday and younger respondents as an outdoor holiday.
- One percent, each, said they have completed planning or are definitely planning a trip to Alberta in the next twelve months. A further 6 percent said they are considering it, 46 percent said they are not presently but would consider it, and 43 percent said they would not consider a trip to Alberta in the next twelve months.
- As with past vacations, outdoor and touring trips were reported to be the most likely trip types to occur.
- On average, respondents who are planning a trip to Alberta estimated they will stay 16 days away from home in total.
- Of the 16 days, approximately 6 will be spent in Alberta and 5 will be spent in a Rocky Mountain location.
- Most respondents planned to travel individually or in pairs (20% and 51%, respectively). The average party size will reportedly be 2.19 individuals.
- Forty percent plan to travel to Alberta in their own car, 17 percent by airplane and rental vehicle, 16 percent in a camper or recreational vehicle, and another 15 percent by airplane.
- Types of accommodations were well distributed with anywhere from 12 to 17 percent reporting that they will stay in luxury hotels, budget hotels, camping or campers, R.V.'s, or motels.
- Fifty-four percent of respondents said they plan to visit Alberta in the summer with 20 percent saying they will visit in the spring, 14 percent in the fall, and only 3 percent in the winter.
- Respondents who are planning a trip to Alberta in the next 12 months reported they would collect information needed from travel agents, tourism departments, automobile clubs, and friends or family.
- Twenty-six percent of respondents who are aware of Alberta said they or someone in their household would consider golfing at various resorts as part of their vacation. Younger respondents were considerably more likely to say this than respondents over 55 years of age. Sixteen percent said they or someone in their household would consider a golf tour vacation at various resorts in the Canadian Rockies.

1. INTRODUCTION

California represents a potentially fruitful tourism market having a total population almost equivalent to the total population of Canada. Alberta Tourism has determined, as part of their strategic marketing plans, to continue to measure and assess travel trends and behavior patterns among California residents. In order to maximize market share, Alberta Tourism determined to measure the size and potential of the California market as well as to assess patterns of travel, in general, and patterns of travel to Alberta, specifically. Overall, how best to reach various segments of the California market which are interested in Alberta and the products it offers was another purpose of this study.

1.1 RESEARCH OBJECTIVES

With these questions in mind, the Terms of Reference for this study were developed. Before turning to the detailed results of the project, we will briefly review the research objectives. The principle objective of the study was to determine "the size, potential, and how best to reach various segments of the California market which would potentially desire an Alberta vacation experience."¹

In addition to the principle objective, the study has the following secondary objectives with respect to the various segments:

1. To determine the frequency of taking a vacation and the percentage of California residents taking specific vacation types; namely,
 - a. Those who fly, spend two nights or more out-of-state, and travel at least 1,000 miles,
 - b. Those who drive, spend five or more nights on their trip of which three nights are out-of-state, and
 - c. In-state or short vacation travel.

¹ Terms of Reference for a California Market Potential Study, Alberta Tourism, 1989

2. To determine the type of vacation, as defined above, usually taken (short versus long duration). This will include the primary purpose of the trip as well as the type of vacation experience sought (i.e. touring vacation, adventure vacation, golf vacation, etc.).
3. How the vacation destination is chosen (eg. for the experience, amenities, weather, facilities, etc.)? What factors are important in choosing a vacation destination?
4. When planning begins for a vacation? When do visitors collect information on destinations? What type of information is collected?
5. How do travellers narrow the choice of vacation destinations? When is a decision made? Which factors used to consider a destination are used in making their final destination decision?
6. In what season do travellers like to take their vacations and why? Which is the primary vacation?
7. How is travel information usually gathered? What kinds of information are required to fulfill planning needs (specifically: government travel literature, travel agents, auto clubs, tour operators, toll-free information lines, coupons, hotels/resorts, airlines, and brochures)?
8. Do travellers visit travel shows? Are these shows useful in making future travel decisions, to increase awareness, or to gather information?
9. What types of print media do they read? Which particular magazines or newspapers are read and how frequently are they read? How often do they watch television and which programs do they view regularly?
10. What type of vacation experience would they like to have? If likely to vacation in Alberta, when would this type of vacation be taken, what would be the length of the trip and the mode of transportation, travel party size, and need for additional travel information?
11. Previous travel experience in Alberta,
12. Awareness of Alberta and its location, and
13. Slogan recall.

In the report which follows, the ways in which these questions were addressed in this survey and the answers received will be discussed in some detail. In addition, a complete set of weighted and unweighted detailed tables are included under a separate cover for the convenience of readers who wish to examine the results more closely.

2. METHODOLOGY

The survey methodology employed in this study was developed in consultation with representatives from Alberta Tourism. The sample frame for the study consisted of residents of California. A systematic random sampling was used and some 4,100 interviews were conducted. The specific details associated with the design of the survey and the analysis of the results are described below.

2.1 QUESTIONNAIRE DESIGN

A questionnaire was designed by Criterion Research to address the objectives of the study. The draft was submitted to Alberta Tourism client representatives and feedback was obtained. Additions, deletions, and adjustments to the survey instrument were made and a pretest was conducted among a small sample of potential respondents. After pretesting, a few minor revisions were made to improve the instrument as a whole. A copy of the final instrument used is included in the Appendix.

2.2 SAMPLING

The target populations for this study were drawn from the total population of California but were stratified by geographic region with enforced quotas. The distribution of the sample follows:

| Regions | Quotas |
|--|--------|
| Los Angeles | 900 |
| San Diego | 700 |
| San Francisco | 700 |
| Other southern California (south of Bakersfield) | 900 |
| Other northern California (north of Bakersfield) | 900 |

In each area a quota of at least 100 respondents from households with incomes under \$25,000 was established. Once this quota was reached, only households with incomes in excess of \$25,000 were interviewed unless they were retired people or students.

Respondents had to be at least 18 years old, speak English, and be the adult in the household whose birthday came next.

2.3 DATA COLLECTION

In all, 4,104 telephone interviews were conducted between Friday, March 9th and April 6th, 1990. Interviews were completed using a computer assisted telephone interviewing (C.A.T.I.) system from Columbia Information Systems in Portland, Oregon. Telephone numbers were generated using a random digit dialing. This methodology relies on a master prefix data base which lists the number of residential telephones assigned to each three digit prefix within the area of interest. Using a computer program, random numbers are generated for each prefix in proportion to the number of residential telephones assigned to the prefix. This strategy ensures a balanced selection of respondents and is not biased by the under-representation of unlisted numbers.

Interviews were conducted during the late afternoons, evenings, and on weekends, and a minimum of three callbacks were made to "not at homes."

When contacting a household, an interviewer would identify himself or herself as an employee of Criterion Research and inform the person contacted that this survey dealt with attitudes towards travel. The interviewer then asked to speak to the person in the household who was over 18 years of age and whose birthday came next.

EXHIBIT 1
SAMPLE DISPOSITION

| | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|---------------------------|-------|-------------|-----------|---------------|------------------|------------------|
| Completes | 4104 | 900 | 703 | 700 | 901 | 900 |
| Refusals*** | 9735 | 3121 | 1700 | 1800 | 1716 | 1398 |
| Terminations** | 891 | 193 | 118 | 124 | 181 | 275 |
| Not-in-service | 9341 | 1580 | 1199 | 1779 | 2992 | 1791 |
| No Answer***** | 75751 | 18704 | 12460 | 13424 | 16392 | 14771 |
| Respondent Not Available* | 192 | 82 | 51 | 21 | 16 | 22 |
| Not Qualified | | | | | | |
| - Quotas Filled | 384 | 84 | 33 | 103 | 62 | 102 |
| - Language | 2326 | 568 | 782 | 208 | 477 | 291 |
| - Business Number | 1193 | 282 | 302 | 202 | 230 | 177 |
| Refusals Rate**** | 39% | 27% | 39% | 36% | 47% | 54% |

* Qualified respondent not available for duration of survey.

** Terminated interview at some point after starting survey.

*** Refused prior to screening questions.

**** Refusal rate is the number of completes to the number of refusals and terminations.

***** No answers are based upon the number of calls, not upon the number of respondents who resulted in a no contact and, consequently, were dropped from the sample. Households received a minimum of three callbacks before they were dropped from the sample.

Exhibit 1 provides a breakdown of the sample disposition and a calculated refusal rate. A total of 9,735 refusals resulted in a refusal rate of 39 percent based upon the percentage of completes to refusals and terminations.

2.4 ANALYSIS

After the interviews were conducted on the C.A.T.I. system, a printout of the open-ended responses for the first 600 surveys was sent to Criterion in Winnipeg and a coding manual was developed. The coding categories were received and approved by Alberta Tourism client representatives. These coding responses were used to code all of the interviews.

The analysis for this report consisted primarily of detailed cross-tabulations of responses to each question by location, market segment, age categories, gender, income groups, likelihood of travel, conversion steps, trip type, and destinations.

Trip types were defined as follows and data was collect for each type of trip.

- a. An outdoor vacation - A vacation in a natural area where you may engage in activities such as camping, fishing, hiking or rafting
- b. A resort vacation - A trip to a resort area where a wide variety of seasonal activities, such as swimming, skiing, golfing, tennis, and so on, are available close by or on the premises.
- c. A touring vacation - A vacation by car or bus or train through areas of scenic beauty, cultural or general interest
- d. A town or city trip - A trip to a town or city where you may shop, visit museums, enjoy entertainment, dine, attend plays or concerts, or just stroll around and enjoy the city.
- e. A visit to friends or relatives - A trip whose primary purpose is to visit and spend time with friends or relatives.
- f. A business or convention trip - For instance, attending a meeting, seminar, conference, or convention
- g. A combined business and pleasure trip - A trip that combines business and pleasure.
- h. A golfing holiday

However, cross-tabulations in the detailed tables included only touring, outdoor, and other trip types. "Other" trip types includes visit to friends/relatives, combined business and pleasure, resort, business/convention, city or town, and golfing trips because the low frequency count for each of these trip types did not warrant individual banners.

The cross-tabulations for destinations include the respondents who said they had at some time visited Alberta, Calgary, Edmonton, Banff/Lake Louise/Jasper, the Canadian Rockies, British Columbia, other ski areas, (Whistler, Vale, Aspen, Whitefish, or Big Sky), and the net number of respondents who had visited Alberta (includes anyone who said they had visited Alberta, an Alberta destination, or the Canadian Rockies).

The data from the study were weighted. The data was weighted back to the population figures for California based upon the July 1, 1989 Census of Population Estimates from the 1980 U.S. Census. The details of the weighting breakdowns are provided below.

1980 CENSUS OF POPULATION - 18 YEARS OR OLDER
MARKET SEGMENTS

| | 18-44 years old no children | Family Households | 45 or more years old, no children |
|---|--|------------------------------|--|
| San Diego | 26.2% | 34.8% | 39% |
| Los Angeles County | 25.1% | 34.6% | 40.3% |
| San Francisco M.S.A. (San Francisco, Marin, San Mateo Counties) | 31.6% | 25.6% | 42.8% |
| Southern California | 21.6% | 38.6% | 39.8% |
| Northern California | 23.3% | 37.2% | 39.5% |

JULY 1, 1989 - CENSUS OF POPULATION ESTIMATES

TOTAL POPULATION

| | |
|---|------------------|
| San Diego | 2,459,500 |
| Los Angeles | 8,710,400 |
| San Francisco M.S.A. (San Francisco, Marin, San Mateo Counties) | 1,598,700 |
| Southern California | 6,628,800 |
| Northern California | <u>9,665,800</u> |
| Total | 29,063,200 |

Before turning to these results, however, a brief digression concerning statistical significance is in order. In the text, no references are made to statistical significance per se because such references can, at times, be very misleading. For a given sample size, it is possible to set what are called confidence bounds or limits around an observed percentage and assert that such limits are correct 95 (or 90 or whatever) percent of the time. These are valuable indicators of the reliability of the observed results and should always be considered when looking at the survey results because such intervals vary dramatically by sample size or cell size in a table (a table of these intervals, therefore, is provided in the Appendix for reference purposes). Having said that, we must also point out the one very real problem with such tables is that they do not give any indication of whether an observed percentage is meaningful. That depends upon the context and the interpretation which will be made, not just the confidence level. For this reason, we have chosen to eliminate references to statistical significance and to focus, instead, on results which seem interesting and meaningful. For those who are interested, however, a complete set of results is included in the detailed tables.

THE HISTORY OF THE

REPUBLIC OF THE UNITED STATES

3. RESULTS

In the following pages, the main findings from the study are presented in summary form. For the convenience of the reader, the findings are grouped under eight headings:

- 3.1 Market Segments,
- 3.2 Vacation Behavior in Past Twelve Months,
- 3.3 Vacation Planning,
- 3.4 Informational Needs,
- 3.5 Media Behavior,
- 3.6 Alberta Vacations,
- 3.7 Alberta Advertising and Slogans, and
- 3.8 Background Information.

In each section, the results will be discussed in total and by region and, where appropriate, by gender, age, and market segment.

3.1 MARKET SEGMENTS

EXHIBIT 2
HOUSEHOLD CONFIGURATION
(Base: Total Sample)

| Household Description | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|---|------------|-------------|-----------|---------------|------------------|------------------|
| n=* | 29064 % | 8710 % | 2460 % | 1599 % | 6629 % | 9666 % |
| Married/Single; 18-44 Years Old; No Children at Home | 24 | 25 | 26 | 32 | 22 | 23 |
| Married/Single; Children Under 18 Years of Age at Home | 36 | 35 | 35 | 26 | 39 | 37 |
| Married/Single; 45 Years of Age or Older; No Children at Home | 40 | 40 | 39 | 43 | 40 | 40 |

* Based on weighted data to 000's.

Q.3 Which of the following three categories best describes your household situation? Are you?

- a. Married or single, between 18 and 44 years old, with no children under 18 years of age at home, or*
- b. Married or single with children under 18 years of age at home, or*
- c. Married or single, 45 years of age or older with no children under 18 years of age at home.*

Overall, 24 percent of California residents are 18 to 44 years old without children (childless young), 36 percent are married or single with children at home (families), and 40 percent are empty nesters; that is, married or single and over 44 years of age with no children under 18 years old at home. San Francisco has the largest percentage of childless young and the lowest percentage of families.

3.2 VACATION BEHAVIOR

EXHIBIT 3

PERCENTAGE OF RESPONDENTS HAVING TAKEN AT
LEAST A TWO-NIGHT VACATION IN THE PAST YEAR
(BASE: TOTAL SAMPLE)
N=29064*

* Based on weighted data to 000's.

Q. 1 Have you taken a vacation of at least two nights away from home in the past year?

In total, 75 percent of the sample had taken a vacation of at least two nights away from home in the past year. There was little difference in the percentage of respondents who took a vacation in each of the five California regions though the percentage of travellers was lowest in Los Angeles. Retired residents and students were less likely than other market segments to have taken a vacation of least two nights away from home in the past year (70% each compared to 77%, 18-44, no children; 74%, families; and 74% empty nesters). Thirty-five to 54 year olds and men travelled more than their counterparts.

EXHIBIT 4

PERCENTAGE OF RESPONDENTS PLANNING TO TAKE AT LEAST A TWO-NIGHT VACATION IN THE NEXT YEAR (BASE: TOTAL SAMPLE)

N=29064

- Based on weighted data to 000's.

Q.2 Do you plan to take a vacation of at least two nights away from home in the next year?

Ten percent more (85%) plan to take a vacation of at least two nights away from home in the next year than the percentage of respondents who actually have vacationed in the last year. Eighteen to 44 year olds with no children and students (89% and 87%, respectively) were most optimistic about their future travel plans as were men (88%) and those 35 to 54 years of age (88%).

Q.10a I would like to ask you a few questions about the primary or main vacation trip you took in the past 12 months. In which month did you begin your primary vacation?

Q.10b In what month did you finally decide upon your destination?

Q.10c In what month did you begin to think about where you would go?

The largest percentage of people in California took their vacation in July or June (14% each), followed by August (13%) and December (10%). Students were most likely to take December vacations and families were more likely than others to take August vacations.

The months during which the most people made decisions regarding their final vacation destination were January, April, May, and June of 1989 (between 8% and 9% each).

EXHIBIT 7

AVERAGE TOTAL LENGTH OF PRIMARY TRIP

(Base: Respondents who have taken
a vacation in the past 12 months)

| Number of Days | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|-------------------|------------|----------------|--------------|------------------|---------------------|---------------------|
| n=* | 23243 % | 6882 % | 2025 % | 1250 % | 5322 % | 7764 % |
| 1 - 6 | 37 | 35 | 34 | 26 | 40 | 38 |

| Mean | 11.6 | 11.1 | 11.8 | 13.4 | 11.3 | 11.9 |

* Based on weighted data to 000's.

Q.11a On this trip, how many nights, in total, did you spend away from home?

The largest percentage of respondents reported that their last primary vacation comprised less than seven nights away from home (37%). Fourteen percent said they were away 7 nights, 28 percent were away 8 to 14 nights, 10 percent vacationed 15 to 21 nights, and 10 percent spent more than 3 weeks on their primary vacation in the past twelve months.

San Francisco respondents, in general, took longer primary vacations than others, being away, on average, 13.4 nights compared to the overall average of 11.6 nights. As well, not surprisingly, empty nesters and retired people took vacations in excess of 21 nights more frequently than their counterparts.

EXHIBIT 8

AVERAGE NUMBER OF NIGHTS SPENT OUTSIDE CALIFORNIA

(Base: Respondents who have taken a vacation
outside California in the past 12 months)

- Mean Values -

| Number of Days | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|-------------------|------------|----------------|--------------|------------------|---------------------|---------------------|

* Based on weighted data in 000's.

Q.11b How many of these nights were spent outside California?

Respondents who had travelled outside California on their primary vacation trip were asked how many nights they, in fact, spent outside the state. Including respondents who spent no nights outside California, on average, 12.0 nights were spent outside California with 1 to 5 nights (19%) and 6 or 7 nights (18%) being the most common answers. Those from San Francisco, on average, spent the most nights out-of-state (14.0 nights). Empty nesters, in general, took more prolonged vacations out-of-state than others.

| Golf | 2 | 1 | 1 | 1 | 3 | 1 |

* Based on weighted data in 000's.

Q.11d What two activities or experiences were you specifically seeking on this particular trip?

Visiting family and friends, followed by relaxation and sightseeing/touring were the three activities that were mentioned most frequently (40%, 34%, and 28%, respectively). Seven percent said they were primarily going to meetings, conventions, or were on business, while 5 percent, each, were interested in sun or sun related activities like swimming and fishing. Four percent, each, were interested in water sports, camping, gambling, and scenery. Three percent said they wanted to ski or participate in some other winter sports while 2 percent specifically mentioned golf.

EXHIBIT 11

PRIMARY PURPOSE OF MAIN TRIP
n=23243*

- * Based on weighted data to 000's.

Q.11e Was the primary purpose of this trip business, vacation, a visit to friends or relatives, or a convention, meeting, or conference?

Fifty-five percent categorized their primary trip as a vacation. Thirty-two percent said it was a visit to friends or relatives, 5 percent said it was a business trip, and 3 percent said they were going to a convention or meeting. There were few significant differences between subgroups except women and retired people were far less likely than others to cite business as the primary purpose of their trip.

EXHIBIT 12

FEATURES THAT CAUSED RESPONDENT TO CATEGORIZE THIS TRIP AS THEIR PRIMARY VACATION

(Base: Respondents who have taken more than one
trip of 2 nights or more in the past 12 months)

- Total Mentions -

| Features | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|---------------------------|------------|-------------|-----------|---------------|------------------|------------------|
| n=* | 19541 % | 5730 % | 1693 % | 1109 % | 4528 % | 6481 |

| Amount of Money | | | | | | |
| Spent | 7 | 5 | 11 | 2 | 7 | 8 |
| Whole Family Went | 6 | 6 | 5 | 2 | 5 | 8 |
| Enjoyment Level | 6 | 5 | 7 | | 7 | 6 |

* Based on weighted data to 000's.

Q.12 What features of this vacation make you consider it as your primary or main vacation?

The largest percentage of respondents categorized this trip as their main vacation because of the length of time they were away (31%). Presumably the longest trip was their main vacation. Twenty percent said the importance of the destination made it a primary vacation, and 14 percent said they categorized it as such because they were visiting family or friends. The only other response to receive in excess of 10 percent was that the distance they had travelled on their trip caused them to categorize it as their primary vacation. Family participation, cost, enjoyment level, and type of activities also influenced between 6 to 9 percent.

Q.15b Where do you usually get any travel information you need when you're planning a trip?

Travel agents, family and friends, automobile clubs, newspapers/magazines, and tourism departments are the most common sources of travel information (43%, 36%, 29%, 15%, and 13%, respectively). Travel agents are viewed as information sources more frequently in San Francisco than in other areas.

EXHIBIT 18

AUTOMOBILE CLUB MEMBERSHIP n=24955

- Based on weighted data to 000's.

Q.16a/16b Are you a member of an automobile club or association? Would that be the California State Auto Association, Auto Club of Southern California, or another club or association?

Forty-five percent of the respondents reported not having an automobile club membership, while 23 percent are members of the Automobile Club of Southern California and 18 percent are members of the California State Automobile Association. Membership in the Automobile Club of Southern California is especially high in Los Angeles (41%), in southern California (32%), and in San Diego (30%). Only 5 and 3 percent, respectively, belong in San Francisco or northern California. As age increases so do membership levels.

Membership in the California State Automobile Association is highest among San Francisco residents (49%) and northern California residents (37%). Also, females and those over 55 years of age are more likely to belong to an automobile club or association than their counterparts.

EXHIBIT 19

PERCENTAGE OF RESPONDENTS WHO HAVE EVER VISITED VARIOUS SHOWS

(Base: Students, retired people, and households over \$25,000)
n=24955*

| Activity | Ever Attended % |
|----------------------------------|--------------------|
| Sports or Outdoor Activity Shows | 49 |
| California State Fair | 44 |
| L.A. State Fair | 26 |
| Consumer Shows | 25 |
| Ski Shows | 16 |
| None/Not Stated | 21 |

* Based on weighted data to 000's.

Q.17a Have you ever attended?

Forty-nine percent of students, retired people, and individuals from households over \$25,000 reported having visited a sports or outdoor show at some time, while 44 percent have attended the California State Fair. Attendance at the other three events was considerably lower with 26 percent having visited the L.A. State Fair, 25 percent a consumer show, and 16 percent a ski show.

EXHIBIT 20

ATTENDANCE AT SPECIFIC FAIRS OR SHOWS IN THE PAST THREE YEARS

(Base: Respondents who have visited each activity in the past 3 years)

- Mean Values -

| Activity (n=*) | Mean No. of Visits in 3 Years | Los Angeles | San Diego | San Francisco | South California | North California |
|---|-------------------------------------|----------------|--------------|------------------|---------------------|---------------------|
| Sports or Outdoor Activity Shows (12299) | 3.6 | 4.0 | 5.5 | 2.8 | 3.2 | 3.1 |
| Consumer Shows (6111) | 1.7 | 1.7 | 1.9 | 2.1 | 1.7 | 1.4 |
| Ski Shows (3868) | 1.5 | 1.9 | 1.6 | 1.3 | 1.2 | 1.3 |
| California State Fair (11070) | 1.3 | 1.1 | 1.3 | 0.8 | 1.2 | 1.5 |
| L.A. State Fair (6373) | 1.2 | 1.4 | 0.7 | 0.2 | 1.3 | 0.3 |

* Based on weighted data to 000's.

Q.17b How often in the past three years have you attended?

Individuals who visit sports or outdoor activity shows are frequent attendees. In fact, on average, they have visited 3.6 shows in the last 3 years. Presumably, this means respondents have attended the same show (for example, a boat show) more than once in the past three years or have attended a variety of different outdoor shows. The mean number of visits to consumer shows is 1.7, to ski shows is 1.5, to the California State Fair is 1.3, and to the L.A. State Fair is 1.2 in the past three years.

EXHIBIT 21

USEFULNESS OF SPECIFIC FAIRS AND SHOWS IN HELPING TO MAKE TRAVEL PLANS AND AS INFORMATION SOURCES

(Base: Those who have ever visited a specific fair or show)

| L.A. State Fair (6373) | 1.9 | 2.2 | 2.0 | 2.3 | 1.8 | 2.1 | 1.3 | 1.5 | 1.9 | 2.2 | 1.7 | 2.0 |

* Based on weighted data to 000's.

Q.17c/d On a scale of one to five, where one represents "not at all useful; and five represents "very useful" how useful do you consider in helping make future travel decisions? How useful are they in providing an opportunity to gather travel information?

In general, all functions were rated more highly as travel information sources than as aids to making decisions about future travel.

As informational sources for travel, consumer shows received a mean rating of 3.5 by attendees, followed by ski shows (mean 3.0). Sports or outdoor shows received a rating of 2.8. California State Fair rated 2.3, and the L.A. State Fair rated 2.2 as a source of travel information.

Each of the activities maintained the same relative position as a travel decision aid.

* Based on weighted data to 000's.

Q.18b On a scale of one to five where one represents "not at all thoroughly" and five represents "very thoroughly," in general, how thoroughly do you read

With the exception of Modern Maturity, the magazines read by the largest percentages of California residents are also read most thoroughly. Reader's Digest received a mean rating of 3.9 and the highest thoroughness rating in San Diego (3.9). Empty nesters (4.0), retired respondents (4.1), and 55 year olds or older (4.0) read Reader's Digest more thoroughly than others.

EXHIBIT 24

Q.18c What newspapers do you subscribe to or frequently read?

The L.A. Times (30%), San Francisco Chronicle (12%), Sacramento Bee (7%), San Diego Union (6%), and Wall Street Journal (6%) were the only newspapers being subscribed to or frequently read by more than five percent of those interviewed. Not surprisingly, regional publications are read by a large percentage of respondents within the geographic boundaries of the publication. Sixty-seven percent of Los Angeles residents read the L.A. Times, 57 percent of San Francisco residents read the San Francisco Chronicle, and 59 percent of San Diego residents read the San Diego Union.

EXHIBIT 25

NUMBER OF DAYS PER WEEK TELEVISION IS WATCHED DURING SPECIFIC TIME PERIODS

(Base: Students, retired people, and respondents from households over \$25,000)

- Mean Values -

| Viewing Times | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|--------------------|-------|-------------|-----------|---------------|------------------|------------------|

* Based on weighted data to 000's.

Q.19 Think now for a moment about your television viewing habits. How many days a week are you likely to watch television between?

Not surprisingly, the most frequently watched television time period is 7 p.m. to 10 p.m. (watched, on average, 4.7 days per week) and 5 p.m. to 7 p.m. (watched, on average, 4.0 days per week).

San Francisco residents and older respondents, in general, estimate they watch television less than individuals from the other California regions and younger respondents. Women estimate they watch more television than men in all time periods except 10 p.m. to midnight. Retired individuals are the heaviest consumers of television among market segments.

EXHIBIT 26

* Based on weighted data to 000's.

Q.20 How many days a week do you watch ?

News is watched for the most days (on average, 5.0 days per week), followed by sitcoms (2.4 days per week), documentaries (1.9 days per week), sports (1.8 days per week), and network movies (1.8 days per week).

All subgroups watch news frequently though retired people, empty nesters, and those 55 years or older are the heaviest consumers of news, documentaries, and network movies. Situation comedies, on the other hand, are most popular with students and the under 35 year olds (2.7 and 2.8 days per week, respectively). Men (2.3 days a week, on average) watch sports considerably more than women (1.5 days a week, on average). Women watch evening and daytime soaps, game shows, and one hour dramas more frequently than men.

3.6 ALBERTA VACATIONS

EXHIBIT 27

AWARENESS OF ALBERTA LOCATIONS FOR A VACATION TRIP

(Base: Students, retired people, and respondents from households with incomes over \$25,000)

| Locations | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|------------------|-------|-------------|-----------|---------------|------------------|------------------|
| n=* | 24955 | 7406 | 2088 | 1359 | 5716 | 8385 |
| | % | % | % | % | % | % |
| Net Alberta | 91 | 91 | 91 | 92 | 91 | 91 |

| Canadian Rockies | 77 | 75 | 79 | 78 | 76 | 77 |

* Based on weighted data to 000's.

Q.21 Have you heard of as a place for a vacation trip?

In total, 91 percent had heard of Alberta or a particular destination in Alberta as a place for a vacation trip. On overall awareness, there was virtually no difference between geographic regions. However, only 73 percent said they were aware of Alberta, suggesting that some are aware of destinations within Alberta (i.e. Calgary and the Canadian Rockies) but are unaware that these destinations are, in fact, in Alberta.

Of specific destinations, Calgary was best known (79%), probably because of the winter Olympics. Seventy-seven percent of the sample were aware of the Canadian Rockies followed by Edmonton (56%), Lake Louise (53%), Jasper (45%), and Banff (44%).

San Franciscans, empty nesters, retired people, and men were most aware of Alberta destinations, in general, as vacation locations.

EXHIBIT 28

DESCRIPTION OF ALBERTA'S LOCATION

(Base: Students, retired people, and respondents from households over \$25,000 who are aware of Alberta as a vacation destination)

| Description | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|-------------------------|-------|-------------|-----------|---------------|------------------|------------------|
| n=* | 22660 | 6702 | 1899 | 1247 | 5174 | 7638 |

* Based on weighted data to 000's.

Q.22 You mentioned you've heard of Alberta or some places in Alberta as a place to visit for a vacation trip. Where is Alberta located?

With little variation between geographic regions, a large majority of respondents were very general in their description of Alberta's location for 66 percent, in total, simply said it is in Canada. However, 8 percent each said it is east of British Columbia or in western Canada. North of Montana was the response provided by 6 percent, and just "north" by 5 percent of those who claimed to be aware of Alberta as a vacation destination.

EXHIBIT 30

AWARENESS OF CALGARY STAMPEDE (Base: Students, retired people and respondents from households over \$25,000) n=24955

• Based on weighted data to 000's.

Q.24a Have you ever heard of the Calgary Stampede?

Sixty-three percent of all California residents were aware of the Calgary Stampede with northern California residents being most aware (66%) and San Francisco residents least aware (60%).

Students had a very low awareness of the Calgary Stampede (34%) compared to other market segments and retired individuals had an especially high awareness (81%). Men, as well, were considerably more aware of the event than women (71% compared to 56%).

EXHIBIT 31

Q.24b How did you hear of the Calgary Stampede?

Friends/relatives and advertising were the two sources contributing most to the awareness of the Calgary Stampede (27% each). Travel experiences, mentioned by 5 percent of aware individuals, was the only other source given by a substantial number of respondents.

There was little difference between subgroups although travel experiences appeared to have a greater impact among San Francisco residents.

EXHIBIT 32

PERCENTAGE OF RESPONDENTS WHO HAVE CONSIDERED VISITING THE CALGARY STAMPEDE n=15610*

* Based on weighted data to 000's.

Q.24c Have you ever considered visiting the Calgary Stampede?

Six percent of those who are aware of the Calgary Stampede have already attended this event, 36 percent have considered going, and 57 percent have not entertained the idea.

Southern California residents were most likely to say they have considered visiting the Calgary Stampede (40%) and San Francisco residents were least likely to have considered a visit (30%). By market segment, families were the most interested (39%) and students were the least interested (23%) in going to the Stampede.

EXHIBIT 33

RELATIVE IMPORTANCE OF VARIOUS FEATURES OF THE CALGARY STAMPEDE IN THE DECISION MAKING PROCESS

(Base: Respondents who have considered visiting the Calgary Stampede)

- Mean Values -

| Feature | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|--------------------------------|-------|-------------|-----------|---------------|------------------|------------------|

* Based on weighted data to 000's.

Q.24d If you were to visit the Calgary Stampede, on a scale of 1 to 5 where 1 is very unimportant and 5 is very important, how important would the be in your decision to attend?

When presented with a series of experiences provided by the Calgary Stampede, California residents, across almost all geographic regions, rated rocky mountain scenery and hospitality/western experience as the two most likely features to influence their decision to attend (mean 4.6 and 4.0, respectively). The two features least likely to impact upon attendance were the agricultural showcase (mean 2.8) and the fair or midway (mean 2.9). Again, geographically, these results are consistent.

EXHIBIT 34

YEAR OF LAST VISIT TO ALBERTA

(Base: Students, retired people, and respondents from households over \$25,000 who have travelled to Alberta in the past, before 1989)

| Year | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|-------------|-----------|-------------|-----------|---------------|------------------|------------------|
| n=* | 5182 % | 1374 % | 478 % | 331 % | 1209 % | 1790 % |

Q.26 Thinking of your last Alberta trip, which one trip type defined below best describes the kind of trip you took? Was it

The largest percentage of respondents categorized their last Alberta trip as a touring trip, with empty nesters, retired people, over 55 year olds, and females being the most likely to do so. Demographically, the opposite is true for the 21 percent who took an outdoor vacation trip to Alberta. Families, students, and men were the most likely to have taken an outdoor vacation to Alberta.

Eight percent, in total, said they had visited friends or relatives, 5 percent had combined business and pleasure, 4 percent had stayed at a resort, 3 percent had attended a meeting or convention, 2 percent had taken a city trip, and less than 1 percent (0.4%) said they had taken a golfing holiday. Respondents in San Diego, northern California and San Francisco reported having taken a golfing holiday more frequently than respondents from other regions (1.2%, 0.6%, and 0.5%, respectively).

EXHIBIT 36
 LIKELIHOOD OF TRAVELLING TO ALBERTA IN THE NEXT 12 MONTHS
 (Base: Students, retired people and respondents
 from households over \$25,000)
 n=24955*

* Based on weighted data to 000's.

Q.27 Which of the following statements best describes your likelihood of travelling to Alberta in the next 12 months; I've already completed planning for a trip, I'm definitely planning on it, I'm considering it, I'm not presently, but would consider it, or I wouldn't consider it.

One percent, each, said they have completed or are definitely planning a trip to Alberta. A further 6 percent said they are considering it, 46 percent said they are not presently but would consider it, and 43 percent said they would not consider a trip to Alberta in the next 12 months.

Across geographic regions, there were no significant differences but, between market segments, empty nesters (specifically those who are retired) were approximately twice as likely to have completed or to be definitely planning a trip to Alberta than other segments.

EXHIBIT 37

TRIP TYPE OF PLANNED VISIT TO ALBERTA*

Q.28 What is the main purpose of this trip you are planning to Alberta? Would it be an outdoor vacation, a resort vacation, a touring vacation, a town or city trip, a visit to friends or relatives, a business or convention trip, a combined business and pleasure trip, or a golfing holiday?

Over one-quarter of the respondents, each, categorized their planned trip as an outdoor vacation (37%) or a touring vacation (26%). Southern California residents were more likely than others to classify their trip as outdoor (56%) but northern California residents said they were planning a touring vacation (36%) in the largest numbers. Fifteen percent planned to visit friends or relatives, 8 percent were planning a resort vacation, 2 percent a golfing holiday, and less than 1 percent were coming to Alberta for a convention or business. No one reported they will be taking a combined business and pleasure trip to Alberta.

EXHIBIT 38

Q.29a How many days will the complete trip take?

Almost two-thirds of those planning to visit Alberta said their total planned vacation will be two weeks or less, while 31 percent will have a holiday in excess of two weeks (15%, 15-21 days; 16%, more than 21 days). The average length of the total vacation is estimated to be 16 days.

It would seem that older respondents are more likely to take extended vacations in comparison to younger individuals.

EXHIBIT 39

** Based on weighted data to 000's.

*** Based on number of actual interviews.

Q.31 What method of transportation best describes what you are planning to use for this vacation?

Forty percent said they were going to travel in their own car. This was the preferred mode of transportation especially for northern California residents (62%). Campers or recreational vehicles will be used by 16 percent (45% of southern California residents and 35% of San Diego residents). A further 32 percent will fly, with 17 percent reporting they will then rent a vehicle to travel within the province.

EXHIBIT 43

TYPE OF ACCOMMODATIONS TO BE USED ON PLANNED VISIT TO ALBERTA*

(Base: Students, retired people, and respondents from households over \$25,000 who have completed planning or are definitely planning a trip to Alberta in the next 12 months)

* Interpret with caution due to small cell sizes.

** Based on weighted data to 000's.

*** Based on number of actual interviews.

Q.32 What type of accommodations will you mainly use while you are in Alberta?

The largest percentage of respondents reported they will stay in luxury hotels while in Alberta (17%). This is especially true among Los Angeles residents (33%) and southern California residents (27%). Campers will be used by 16 percent (especially San Francisco and northern California residents) and recreational vehicles by 15 percent (particularly southern California residents). Fourteen percent will stay in motels, 12 percent in budget hotels, and 7 percent with friends or relatives. Nine percent will use some kind of alternate accommodations.

EXHIBIT 44

LIKELY SEASON OF PLANNED VISIT TO ALBERTA

(Base: Respondents who have completed planning or are definitely planning a trip to Alberta in the next 12 months)

Weighted n=514*

Unweighted n=66**

- * Based on weighted data to 000's.
- ** Based on number of actual interviews.

Q.34 Will your Alberta vacation likely occur in spring, summer, fall, or winter?

More than half of the respondents who are planning to visit Alberta in the next 12 months will do so in the summer (54%). Twenty percent will visit in the spring, 14 percent in the fall, and only 3 percent in the winter. All those who said they would visit in the winter were men under 35 years of age. Families are far less likely to travel in the spring than 18 to 44 year olds with no children or empty nesters (4% compared to 26% and 24%, respectively). Summer travel is relatively consistent across market segments. Families are more likely to travel in the fall than either 18 to 44 year olds with no children or empty nesters (43% compared to 12% and 4%, respectively).

EXHIBIT 45
 LIKELY INFORMATION SOURCE FOR TRIP TO ALBERTA
 (Base: Respondents who have taken a trip
 and are aware of Alberta)
 n=13438*

* Based on weighted data to 000's.

Q.35 *If you were planning a trip to Alberta, Canada, how would you collect the information you needed?*

Travel agents, tourism departments, automobile clubs, and friends or family are the most common sources that potential visitors would access (total mentions: 52%, 28%, 24%, and 15%, respectively).

Travel agents were mentioned most frequently by 18 to 44 year olds without children (60%), students (68%), those under 35 years of age (61%), and women (55%).

Contacting Alberta Tourism or a government department was mentioned most often by empty nesters (33%), retired people (37%), and men (31%).

Automobile clubs are not used as often by the childless young (18%), students (17%), and men (21%) as by other subgroups.

EXHIBIT 46

PERCENTAGE OF RESPONDENTS LIKELY TO CONSIDER GOLFING
AT VARIOUS RESORTS AS PART OF AN ALBERTA TRIP

(Base: Respondents who are aware of Alberta)
n=13438*

* Based on weighted data to 000's.

Q.36 If vacationing in the Canadian Rockies, would you or someone in your household consider golfing at various resorts as part of your trip?

If a Canadian Rockies vacation occurred, 26 percent said they or someone in their household would consider golfing at various resorts in the course of the trip. As age increased, the interest in golf decreased (30%, under 35 years of age; 28%, 35-54 years of age; 18%, 55 years or older). Men, as well, were somewhat more likely than women to say someone in the household would golf on a Canadian Rockies vacation (29% and 23%, respectively).

EXHIBIT 47

PERCENTAGE OF RESPONDENTS LIKELY TO CONSIDER A GOLF TOUR TO VARIOUS RESORTS IN THE CANADIAN ROCKIES

(Base: Respondents who are aware of Alberta)
n=13438*

* Based on weighted data to 000's.

Q.37 Would you or someone in your household consider a golf tour vacation at various resorts in the Canadian Rockies?

Compared to the percentage of respondents who would consider golfing while on vacation, the percentage who would consider a golf tour is 10 percent lower (16%). San Diego respondents were most interested while southern California residents were least interested (20% and 14%, respectively).

EXHIBIT 48

PERCENTAGE OF RESPONDENTS RECALLING ADVERTISING FOR ALBERTA IN PAST TWELVE MONTHS

(Base: Students, retired people and respondents
from households over \$25,000)

n=24955*

* Based on weighted data to 000's.

Q.38 In the past 12 months have you seen or heard any advertising for Alberta?

Thirty-eight percent of respondents recalled advertising for Alberta in the past twelve months. San Francisco residents were the most likely to recall Alberta advertising (47%) and Los Angeles residents were least likely to do so (34%). There was a considerable difference between students and retired individuals who recalled advertising for Alberta in the past 12 months (23% compared to 37%). Males, too, were more likely to report they had seen Alberta advertising than females (42% and 34%, respectively).

EXHIBIT 49

SOURCE OF ADVERTISING RECALL

(Base: Those who recall some Alberta advertising in past 12 months)

| Media | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|------------|-----------|-------------|-----------|---------------|------------------|------------------|
| n=* | 9449 % | 2541 % | 809 % | 638 % | 2237 % | 3223 % |
| Television | 61 | 64 | 61 | 54 | 66 | 56 |
| Magazines | 53 | 41 | 52 | 62 | 55 | 61 |
| Newspaper | 16 | 23 | 17 | 14 | 14 | 11 |
| Radio | 2 | 2 | 1 | 3 | 2 | 1 |
| Billboard | 1 | 3 | 4 | 1 | 1 | 0 |
| Posters | 1 | 1 | 1 | 2 | 1 | 0 |
| Other | 10 | 10 | 8 | 4 | 8 | 13 |

* Based on weighted data to 000's.

Q.39 Where did you see or hear this advertising?

Television and magazine advertising was recalled most frequently (61% and 53%, respectively). Television's impact was greatest in southern California and Los Angeles while magazines were recalled more frequently by San Francisco residents (62%) and northern California residents (61%). In total, 16 percent recalled advertising from newspapers (especially in Los Angeles). Radio, billboards, and posters received extremely low response rates of 1 or 2 percent each.

As age increased, recall of magazine and newspaper advertising increased. This difference is especially marked when the percentage of students who recalled magazine advertising is compared to retired response rates (36% versus 63%). Television, on the other hand, is recalled considerably more frequently by younger respondents than older ones (under 35 years, 74%; 55 years or older, 45%).

** Census - 1980 U.S. Census, Persosn by Race

*** Includes Japanese, Chinese, Filipino, Korean, Asian Indian, and Vietnamese

Q.49 Which of the following categories best describes your race or ethnic background?

Almost four-fifths of the total sample were Caucasian or white with 7 percent being black or African American, 6 percent being Hispanic or Central American, 3 percent each being Asian Pacific Islander and Native American.

Los Angeles had the largest percentage of Black or African American (16%) and Hispanic or Central American (9%). On the other hand, San Francisco had the largest percentage of Asians or Pacific Islanders (7%).

EXHIBIT 52

TOTAL HOUSEHOLD INCOME BEFORE TAXES

(Base: Total Sample)

| Income | Total | Los Angeles | San Diego | San Francisco | South California | North California |
|---------------------|------------|-------------|-----------|---------------|------------------|------------------|
| n=* | 29064 % | 8710 % | 2460 % | 1599 % | 6629 % | 9666 % |

4. CONCLUSIONS

California residents travel extensively with three-quarters of them reporting having taken a vacation of at least two nights away from home in the past year. Of the total sample, 1.3 percent reported they have visited Alberta in the past 12 months, while 3.0 percent reported visiting Alberta or an Alberta location in the past 12 months. These percentages reflect a possible 389,000 or 867,000 visitors in the past year.

Just under 2 percent of the total sample report they have already completed planning or are definitely planning a trip to Alberta in the next 12 months (1.8%). This reflects just over one-half million (514,000) trips or 6,753,960 person days (an average of 6 days will be spent in Alberta by 2.19 people in a party). However, respondents are usually optimistic in their estimations of future behavior and, consequently, these numbers are undoubtedly inflated. However, in tracking planned travel behavior to actual travel behavior over a two year time span, the Alberta Tourism 1989 Conversion Study found that approximately 25 percent of respondents who had already completed planning or were definitely planning a trip to Alberta in 1988 actually took the trip in the next 12 months. Assuming, then, that 25 percent of the person days in this study are realized, California residents will spend 1,688,490 person days in Alberta in the next year (128,500 trips).

By market segment, the projected number of person days breaks down as follows revealing that empty nesters are the most converted to travelling to Alberta in the next 12 months. The position of the other two market segments is less positive.

| | |
|--|---|
| a. 18 to 44 year olds without children at home | $1,340,280 \times 25\% = 335,070$ person days |
| b. Families | $1,340,280 \times 25\% = 335,070$ person days |
| c. Empty nesters | $4,060,260 \times 25\% = 1,015,065$ person days |

An examination of only the student and retired market also reinforces the strength of the existing retired market in potential person days to Alberta in the next 12 months.

| | |
|----------|---|
| Students | $367,920 \times 25\% = 91,980$ person days |
| Retired | $1,511,100 \times 25\% = 377,775$ person days |

Specifically, the following information suggests that certain features of Alberta as a vacation make it attractive to California residents and can be used to develop marketing messages for potential visitors.

- Alberta is likely to appeal to the older or retired market because it offers opportunities for a touring type vacation and because those who take touring vacations, on average, are away for a longer time so the distance away would be less daunting.
- Alberta is likely to appeal to the 18 to 44 year old without children market because it offers an outdoor vacation experience. There is greater potential for fly-in vacations among respondents earning in excess of \$40,000.
- Forty-four percent of California residents flew to a vacation destination of more than 1,000 miles away in the past year and approximately 35 percent drove out-of-state for a 5 night or more vacation.
- Those respondents most converted to travelling to Alberta rate natural beauty, value, and a sense of wilderness higher than the less converted.

Awareness of Alberta or some location in Alberta is high (91%), though continued efforts to raise awareness of "Alberta" in and of itself and of specific locations in Alberta (namely, Banff, Jasper, and Lake Louise) is necessary as some levels hover around the 50 percent mark.

Forty percent will travel in their own car, all types of accommodations will be used in equal proportions, and most will visit in the summer.

Fifty-four percent of California residents have heard of the Calgary Stampede, mostly from advertising or friends or relatives. Three percent have actually visited it and 19 percent have considered a visit. This event is likely to appeal to families, especially if the scenery, the hospitality, the western experience, and the cowboys and rodeo are featured in the communication materials.

There are several specific behaviors and attitudes prevalent among California residents where marketing messages might be targeted to change these behaviors and attitudes. They are:

- Alberta appears to appeal to families less than to other groups. These travellers are not interested, to any great extent, in touring vacations. Rather they prefer outdoor holidays with lots to see and do. It would seem that their impression of Alberta is that there are things to do but a visitor must travel to each one. Suggesting that one Alberta destination can offer all that is needed, like a variety of things to do and a place to relax, might overcome some of the resistance families have to take an Alberta vacation.
- Alberta is not the primary destination of a substantial percentage of visitors as less than 1 percent of the total sample specified an Alberta destination as their primary trip but 2 percent actually had been to Alberta in the past year. Perhaps it is treated as a pass through destination or as a destination for shorter trips.
- Overseas travel is popular. Alberta should position itself as an alternate destination which is closer to home and less expensive.
- Offering an alternate type of vacation other than visiting friends or relatives to the lower income, less converted individuals may result in a greater interest by these California residents in vacationing in Alberta.

Meeting the informational requirements of would-be visitors is necessary. Essential informational requirements center around accommodations, maps/routes, places to see and visit, transportation, weather, and costs. This information is mainly sought from travel agents and automobile clubs. Automobile club membership is over 50 percent with the Auto Club of Southern California having the largest membership (23%), followed by the California State Auto Association (18%), necessitating a supply of Alberta travel information be available to them.

Attendance at sports or activity shows is high (42% of the total sample) with individuals attending an average of 3.56 times in the past three years. Based upon opinions towards fairs and shows, it can be concluded that Alberta Tourism should be represented at consumer or sports (including ski) shows, while state fairs are likely to result in a lower return on investment.

The magazines which have the highest subscription and are read most thoroughly are Reader's Digest, National Geographic, Sunset Magazine, and Time Magazine. Backpacker, a special interest magazine, does not have an extensive circulation but is thoroughly read by those who subscribe to it. On the other hand, Motorland has a relatively high distribution but is not read thoroughly.

The newspapers which are likely to reach the greatest number of people are the L.A. Times, the San Francisco Chronicle, and the Sacramento Bee.

Almost one in four possible visitors or 12 percent of California residents would consider golfing as part of their vacation but only 10 percent actually said they did golf on their last primary vacation. Under 1 percent (0.07%) said they or someone in their household would consider a golf tour vacation at various resorts in the Canadian Rockies.

APPENDIX

CALIFORNIA MARKET POTENTIAL STUDY

Telephone: (_ _ _) _ _ _ - _ _ _ _

Project No.: 1810390

Good morning/afternoon/evening. My name is _____, and I am calling from Criterion Research Corp. in Canada. We are conducting a survey about attitudes towards travel.

A. RECORD LOCATION

LOS ANGELES 1
SAN DIEGO 2
SAN FRANCISCO 3
SOUTHERN CALIFORNIA .. 4
NORTHERN CALIFORNIA .. 5

B. May I speak to the person in your household who is over 18 years of age and whose birthday comes next?

C. Would that be you?

Yes 1 - SKIP TO Q.1
No 2 - CONTINUE

D. May I please speak to that person?

Yes 1 - REINTRODUCE YOURSELF
AND SKIP TO Q.1
No 2 - CONTINUE

E. Whom should I speak to and what is their relationship to you?

(IF SPOUSE OF SIGNIFICANT OTHER, COMPLETE INTERVIEW WITH PERSON WHO ANSWERED PHONE. IF A ROOMMATE, SON OR DAUGHTER OVER 18 YEARS OLD, COUSIN, AUNT, UNCLE, BOARDER, ETC., MAKE AN APPOINTMENT FOR A CALLBACK.)

1. Have you taken a vacation of at least two nights away from home in the past year?

Yes 1
No 2

2. Do you plan to take a vacation of at least two nights away from home in the next year?

Yes 1
No 2

3. Which of the following three categories best describes your household situation? Stop me when I reach the appropriate category.
- a. Married or single, between 18 and 44 years old, with no children under 18 years of age at home. 01
- b. Married or single with children under 18 years of age at home. 02
- c. Married or single, 45 years of age or older with no children under 18 years of age at home. 03
4. Are you ...
- a) working full time 1
 - b) working part time 2
 - c) a student 3
 - d) retired 4
 - e) unemployed, or 5
 - f) a full time homemaker 6
 - g) other 7
5. Is your total household income over \$25,000.00?
- Yes 1
 - No 2

NOTE QUOTAS - N=500 (UNDER \$25,000 NOT A STUDENT OR RETIRED.)
 N=3,600 (OVER \$25,000, OR A STUDENT OR RETIRED.)

SECTION I - VACATION BEHAVIOR IN PAST 12 MONTHS

6. Now, I am going to describe four specific types of vacation trips that people commonly take. I would like you to think about the last 12 months (March to March) and tell me how many trips of each type you've taken.

The first type of trip has these characteristics:

The final destination was at least 1000 miles away from home. You flew and you spent 2 or more nights outside California.

How many trips of this type have you taken in the past year? _ _

7. The second type of trip has these characteristics:

The trip included 5 nights or more away from home, of which at least 3 nights were outside California and you drove.

How many trips of this type have you taken in the past year? _ _

8. The third type of trip has these characteristics:

The trip was taken within California during which you spent two nights or more away from home. This category includes both flying and driving trips.

How many trips of this type have you taken in the past year? _ _

9. Finally, how many other trips of at least 1000 miles away from home have you taken outside of California where you have combined both business and pleasure in the past year? _ _

IF NO TRIPS AT ALL BUT OVER \$25,000, SKIP TO Q.15A

IF NO TRIPS AND LESS THAN \$25,000, GO TO DEMOGRAPHICS

10a. I would like to ask you a few questions about the primary or main vacation trip you took in the past 12 months. In which month did you begin your primary vacation? (VERIFY YEAR)

10b. In what month did you finally decide upon your destination?

10c. In what month did you begin to think about where you would go?

| | Q.10A | | Q.10B | | Q.10C |
